

The Cambridge AICE Diploma is evolving

The Cambridge AICE Diploma is a group award that recognizes the achievements of students who have experienced the balanced and stimulating curriculum of [Cambridge International Advanced Subsidiary Level \(AS Level\) and Advanced Level \(A Level\)](#). The diploma program was launched in Florida, USA in 1997, where it continues to receive strong legislative support and funding. Now, used by schools around the world, the Cambridge AICE Diploma is evolving to make sure it continues to prepare students for success at college and beyond.

Preparing students for college success

Alongside in-depth understanding of their subjects, students also need to master a broader range of skills critical for success in university study and employment. The Cambridge AICE Diploma is changing to place more emphasis on essential skills such as the ability to:

- think critically
- carry out independent research
- evaluate arguments
- communicate clear and well-reasoned arguments
- understand global issues from multiple perspectives.

This evolution will help higher education institutions identify students with the type of cohesive academic experience and higher-order thinking and communication skills that are associated with distinguished achievement at university.

Thinking critically, independently and globally at the core of the diploma

To achieve the diploma all learners will need to study and pass the Cambridge International AS Level Global Perspectives curriculum. This skills-based course challenges learners to think critically, analyze evidence and compare perspectives. The curriculum is assessed through a range of options, including a written examination, team project and presentation.

The course is built around an innovative teaching and learning process called the Cambridge critical path. This supports learners to think critically and objectively, leading to a deeper understanding of their chosen topic. Cambridge International AS Level Global Perspectives is available for first teaching from August 2014.

A rigorous and stimulating program that ensures breadth and depth

The Cambridge AICE Diploma is designed to deliver breadth across the curriculum and depth in selected subjects. Learners have to achieve a minimum of seven credits from at least three subject groupings and the core (Cambridge International AS Level Global Perspectives) to be awarded the diploma.

Within the diploma a Cambridge International AS Level examination passing score is awarded one credit and a Cambridge International A Level examination passing score is awarded two credits.

Support from Higher Education

From Duke University

“**Duke University** welcomes students who have taken the new curriculum from Cambridge, ‘Cambridge Global Perspectives’. Cambridge Global Perspectives puts an emphasis on a number of the skills that students need in order to be successful in their university education. We particularly value the independence of thought, critical thinking and research and inquiry skills that Global Perspectives develops.”

Massachusetts Institute of Technology (MIT) praises the educational values of Global Perspectives, saying that its values are similar to those of MIT, which are:

- Deep understanding with depth and rigour
- Problem solving, critical thinking, creativity, team work, independent learning and effective communication
- Promoting an international outlook and cross-cultural awareness.
